

Advancing School Environmental Health Stakeholder Engagement

Project Title	Advancing School Environmental Health Stakeholder Engagement
Project Summary	Help accelerate the adoption of EPA's suite of guidance for creating healthy indoor environments in K-12 schools, including a newly updated mobile app. Team with environmental professionals to create and implement a communications strategy, then track the impacts of your work using web analytics.
Country	United States

Project Description

You will work to develop and implement a communications plan to market EPA's IAQ Tools for Schools guidance, including the newly updated School IAQ Assessment Mobile app. Working with EPA program and communications experts, you will also investigate the adoption of these and other web resources using web analytics and other data sources. You will be introduced to additional topics in the area of indoor air quality risk communications; and have the opportunity to engage with a cadre of environmental public health and communications professionals. Over the course of this internship you will build a network of contacts and have an opportunity to hear about various career paths in environmental public health.

Required Skills or Interests

Skill(s)
Marketing
Social media management
Writing

Additional Information

Learn about EPA's IAQ Tools for Schools program at www.epa.gov/iaq-schools. The ideal candidate will have an interest in environmental science, public health, education and/or communications, skill in using contemporary social media tools, and be comfortable working both in a team setting and independently. Written

and oral communications experience preferred; Spanish language fluency helpful but not required.
